1 year

### PRICE (USD)\*

\$249 (including built-in microphone)

\*Doesn't include shipping, duties and fees, which may vary by geography

Wildlife Acoustics' Song Meter Micro gives you an inconspicuous and durable wildlife recorder at an affordable price. The Song Meter Micro is the latest in our Song Meter recorder series. Get more data for your dollar by deploying dozens of recorders at once or run short-term projects with a compact and supported wildlife recorder. Mount the recorder in a desired location, configure settings via our free Song Meter Micro app, and record birds, frogs, and other vocal wildlife.

## Features

- Affordably priced at \$249
- Lightweight, compact and weatherproof for any environment, including built-in microphone
- Change settings and schedule wirelessly via Bluetooth on your mobile device
- Automatically sends recorder status to the app via Bluetooth
- Uses your mobile device to set date, time, time zone and location
- Compatible with Kaleidoscope Pro software to quickly scan recordings to help find species of interest

## How It Works

- Listen** Many animals produce distinctive vocalizations which can be used to detect their presence even when they can't be seen
- Record** Wildlife audio recorders capture wildlife sounds in any environment over long periods of time
- Analyze** Kaleidoscope Pro analysis software quickly detects biological vocalizations and clusters them by similarity to efficiently find species of interest

## About Wildlife Acoustics

Wildlife Acoustics specializes in wildlife audio recorders and software, specifically designed to capture vocalizations of birds, bats, frogs and other wildlife. Wildlife Acoustics has sold over 50,000 recorders in over 100 countries – helping researchers, universities and government agencies conduct species inventory, presence/absence surveys and habitat health monitoring.
