Eco Bat Shelter

SKU:B1EBSZZZ

Construction : Recycled plastic with ceramic insert.
Stainless steel staples

Options: Brick coloured front panel
(B1EBSBRZZ)
Black coloured front panel
(B1EBSBLZZ)

Installation : Four screw holes provided.
Vertical (Centre to centre 90mm)
Horizontal (C.T.C. 165mm)

Installer to select appropriate fixings based on surface bat shelter is being fixed to. If the surface is uneven and gaps are present around edges of the shelter, silicone or foam strips can be used to seal edges, to reduce the likelihood of drafts in the box, making the shelter more attractive to bats.

Usage : Primary usage in frost free buildings, tunnels, cellars, beneath bridges, unheated loft spaces etc. to provide winter hibernation roost space.

Can also be installed on external walls to provide day roost.

Maintenance : Eco Bat Shelter is maintenance free as droppings fall out of base.
Recycled plastic shell is UV stabilized requiring no treatment.
