

WOODEN TAWNY OWL NEST BOX 10675

SPECIES: BIRD

MATERIAL: Solid FSC certified timber, with re-cycled plastic upper and lower hanging/fixing plates

DIMENSIONS (MM): 770 x 220 x 415

WEIGHT (KG): 6.45

SPECIES: Tawny Owl

SITING: high on a mature tree between 3.5 and 5 metres with clear flight path to the entrance. When the fledglings emerge, they use nearby branches to access higher areas of the tree canopy.

The box should ideally face East / Northeast or South East. The availability of prey species close to the nesting box is vital. The proximity of fruiting or nut bearing trees and shrubs that support these target species would indicate a suitable nesting site.

MAINTENANCE: The box may be inspected in May, but care should be taken opening the inspection hatch.
