

## **M500-384/Bat Recorder compatibility**

Regarding suitable Android devices, most of them should work with the Bat Recorder app. However, we do know of a few that do not work (hardware limitations regarding USB Audio) as do we know of a handful of units that work for sure.

### ***Devices that have been tested and found NOT to cope with 384 kHz USB audio:***

- \* Acer Iconia A1-810
- \* Lenovo Tab 2 A7
- \* Lenovo A3500
- \* Wiko Rainbow 4G
- \* Archos101d neon
- \* Samsung A tab7
- \* Huawei P7
- \* Evolveo Strongphone Q4

### ***Devices that have been tested to work fine with 384 kHz USB audio (and thus work with the M500-384):***

- \* Moto G - first generation (probably second generation as well but not third generation - its doesn't support USB OTG)
- \* Nexus 7
- \* Samsung Galaxy S3 thru S6 and probably S7 as well
- \* Motorola RAZR M XT905
- \* Samsung Galaxy Note (only some models tested, but probably all are fine)

In addition to this, the BatRecorder developer has a list of compatible devices and most likely the majority of these will work fine with the M500-384:

*First, Bat Recorder requires an Android device that:*

- \* *Runs Android OS 4.3 or higher*
- \* *Uses either ARM or x86 architecture (the vast majority of Android devices use the former)*
- \* *Supports USB OTG to power the microphone.*

*Here is an incomplete list of compatible devices - there are undoubtedly other devices that also work, meaning just because something is not on the list, doesn't it mean it couldn't work.*

*There are free apps on the Play Store that allow you to test whether your phone / tablet supports USB OTG - presumably, a user could download and run this to confirm*
